

# WHAT TO ASK YOUR DOCTOR ABOUT BIOMARKER TESTING

Biomarker testing helps give a more complete picture of what may be causing your lung cancer to grow and spread. It's important to know your results. Then talk with your doctor about which treatment options are proven to work for your type of cancer.

## TEST

**Has my lung cancer been tested for biomarkers like EGFR?**

---

---

**What were the results?**

## KNOW

---

---

Tests completed:

ALK    BRAF    EGFR    NTRK    PD-L1    ROS1   Note: Test results take time to come back.

**What tests are we still waiting for?**

---

---

**What are my treatment options based on my results?  
What treatments have been proven to work for my type of cancer?**

## TREAT

---

---

**Notes**
